I am over the road truck driver , I use the weather and road report that xm radio have and i think it will be big injustics to the truck driver . without this service i would set on side of the road to listen to fm or/ am chennal that you can get 50 to 75 miles from any town. radio chennals done like this . cd radio are no good. this make me very upset to hear this. i will not listen to them!!!!!!!!!!!!. what do you like to am truck driver in a accident all the time?????????. and I really need this service and without this I can not do my job!!!!. xm radio is the only radio I listen to and it is better than fm or/ am radio. I think the people could worry about doing their jobs 100% better than what they are doing.
